SUMMARY

- I am a fourth-year student majoring in Information Technology.
- I have experience at Software using ReactJS, NodeJS, Java, ... in school projects.
- My goal is to leverage my technical skills and knowledge to become a proficient Software Developer
- I am looking for a job opportunity to learn more experience in website and software development.

WORK EXPERIENCE

Interactive Coding Learning Platform - Github   Sep 2024 - Jul 2025

- *Project Description*: Developed a web application designed to help beginners learn programming. As a further development project based on the Learn Programming for Beginners Application (below) project but running on web platform. The project has some more advanced features.
- Key Features:
  - Projects using MERN Stack for development (ReactJS, NodeJS, MongoDB, ExpressJS).
  - Interactive video: The videos have been uploaded by instructors, students can watch them directly. There are some the interactive questions on these videos, students will answer them while watching.
  - Road map: Create your roadmap by using AI assistant (Qwen2.5 API). Using a set of questions about your goal.
  - Lesson system: Includes 4 kinds of lessons: Video, Supplement, Quiz, Programming.

Blog websites - Github   Jul 2025 - Present

- *Project Description*: Developed a personal blog website to share articles, experiences, and portfolio projects. The platform is built with a modern web stack, ensuring both performance and scalability. It serves as a central place to publish posts, showcase work, and engage with readers.
- Key Features:
  - Technology Stack: Built with Next.js (React framework) for the frontend, NodeJS for backend APIs, and MongoDB for data storage.
  - Blog System: Users can read blog posts with Markdown support, SEO-friendly pages, and responsive design for mobile and desktop.
  - Portfolio Showcase: A section to display personal projects, including detailed descriptions and links.
